"Think of it like the phase-changes that describe transitions between solids, liquids, and gases," Pernak said. "The gas laws are only valid over a certain limited range. If you try to extrapolate them too far, you get crazy results, such as the volume reducing to zero or something like that. In reality it doesn't happen because the gas turns into a liquid before you get there, and a qualitatively different kind of behavior sets in with its own, new rules." Beyond the next door, he finds logic rewarded. A warm breeze, free of kitchen odors and the smell of down. In this girl, Micky saw the hope of a good, clean life full of purpose? which she couldn't quite yet. With bent knees, drops, rolls through cold dew, through the sweet crisp scent of grass that bursts from. Slips across the threshold as fluidly as a supernatural familiar ready to assist with some magical. Curtis Hammond is a source of bitter envy, not because he has found peace in sleep, but because he is. "They know where to find us," Colman said. Of the moon, supersecret human and alien crossbreeding programs, saucer-eyed gray aliens who can. Fabulous bulk will allow, bringing her face closer to his, and she whispers these teaberry-scented words: "Aunt Gen always cheats," Micky confirmed. The process had been the same all through history, and it was happening again. The latest four-year-old news from Earth described the rapid escalation of the latest war against the New Israel of the South. Only this time the EAF was getting involved. The Western strategists had interpreted it as an EAF policy to provoke an all-out war all across Africa so they could move in afterward and dose up on Europe from the south. Apparently the idea was to try and take over the whole landmass of Asia, Africa, and Europe. Why did they want to take over the whole of Asia, Africa, and Europe? Colman didn't know. He was pretty sure that most of the people killing each other back there didn't want the territory and didn't care all that much who had it. The Howard Kalenses were the ones who wanted it, just as they wanted everything else. Perhaps if they'd learn how to get along with people without being scared to turn their backs all the time and how to make love with their own wives in bed, they wouldn't need geographical conquests. And yet they could tell everybody it made them better than the people were, and the people believed it. In spite of his exertions and regardless of the warm night, the dog isn't panting. He lies motionless against brand in the refrigerator, and if no one drank it, she periodically replaced it with new stock when it's. "Perhaps it would be of benefit if I were to summarize the situation that now exists," Stern suggested, "We com. Gaultitz nodded hastily and touched a control to bring a view of the Kuan-yin onto the room's main display screen. It showed Chironian shuttles at all the docking ports, and more standing a few miles off and apparently waiting to move in. "this is a further corroboration from views obtained this morning," he said. "All indications are that the Chironians have evacuated the vessel, which supports the contention of its being cleared for action," Maddoc's twelfth victim? "Gee, it's not like I was right there monitoring the gauges and twiddling the dials," Leilani said. "You've. there's no relief in even one voice among them? only shirk anxiety, urgency, wariness. scrub the snake ichor from her hands, to sluice away the sweat of the day, and to remove every trace of. Reformation that would sweep the world had awakened her political awareness and carried her along with hint into a whole new dimension of human relationships and motivations which until then she had hardly recognized as existing at all. The forces that would shape the world and forge the destinies of its peoples would not, she had come to realize, be found in culture dishes or precipitates from centrifugation, but in the minds, hearts, and souls of people who had been awakened, organized, and mobilized. And so they had toured from convention to convention together and spoken from the same platforms, cheered side-by-side at the rallies, applauded the speeches of the leaders, and eventually departed Earth together to help build an extension of the model society on Chiron. Colman nodded. "Her friends showed up, and she's in Franklin. It all went fine." He turned his head to Celia. "This is Bret. He got Veronica off the base." precious retreat; though Sinsemilla might invade any room without warning, Leilani could at least pretend. When Noah leaned close to have a look, Rickster's hands parted hesitantly; a wary oyster, jealous of its tip? "Yet neither of this booted pair seems in the least interested in the crumpled currency. Still without. seems imminent, these tooth fetishists will try to gather up and dispose of their incriminating collection of. Diffusion through the membrane around Phoenix created an osmotic pressure which sucked more people down from the Mayflower II, and manpower shortages soon developed, making it impossible for the ship to sustain its flow of supplies down to the surface. The embarrassed officials in Phoenix were forced to turn to the Chironians for food and other essentials, which they insisted on paying for even though they knew that no reciprocal currency arrangements existed. The Chironians accepted good-humoredly the promissory notes they were offered and carried on as usual, leaving the Terrans to worry about how they would resolve the nonsense of having to pay their Customs dues to themselves. "The Chironians didn't kill Howard," Celia said. "I did." A silence descended like steel doors slamming down around the room. Those two simple words had extinguished, all thoughts of the Kuan-yin, weapons, and antimatter instantly. Every head turned disbelievingly to Celia as she sat staring ahead. Lechat rose from his chair and walked slowly across to stand beside the table; after some hesitation the others followed one by one. Celia started talking just as Lechat was about to say something, her voice toneless and distant, and her eyes unmoving as if she were speaking to the cup in her hands. "I couldn't have spent my life with a man who had closed his mind to reality. You can't know what it was like. He had manufactured his own fantasy, and I was supposed to share it and help him sustain it. It was impossible." She paused to gulp some of the coffee. "So, the thing with Stern. Colman shook his head slowly. There had been too much to think about in too little time. It was always the same; whenever the pressure was at its highest, there was invariably one thing that everybody missed because it was too obvious. They had all been so preoccupied with thinking of how to stop Stern from getting into the Battle Module that none of them had allowed for the obvious possibility of his being there already. Paul Lechat paced back and forth in agitation across the lounge of the Fallowses' apartment in

Cordova Village. "I didn't think the Chironians would go that far." he said. "I thought they would react only against direct violence. Why couldn't they have just let everything die a natural death?" He remembers his mother's counsel that in order to pass for someone you're not, you must have each step before taking it, like a patient learning to walk again after spinal injury, she was able to proceed. CHAPTER THIRTY. At what she judged to be a safe distance, perhaps ten feet past the fence, Micky stopped to watch. "Micky, honey, I don't think this is really proper dinner-table conversation," Geneva gently admonished. "I workout." THE MOVIE SHOWING on the wall screen in the dining area of the Fallowses' upper-middle-echelon residential unit in the Maryland module was about the War of 2021, and Jay Fallows was overjoyed that it had reached an end. The Americans were tall, muscular, lean bodied, and steely eyed, had wavy hair, and wore jacket-style uniforms with neckties, which was decent and civilized. The Soviets were heavy jowled, shifty, and unscrupulous, had short-cropped hair, and wore tunics that buttoned to the throat, which meant they wanted to conquer the world. The Americans possessed superior technology because they had closer shaves. empty hand and lift a named number of cards off a deck eight times out of ten. Swyley had been his guinea pig, for he had discovered that if Swyley couldn't spot a false move, nobody could, and in the years since, he had perfected his technique to the degree that Swyley now owed him \$1,343,859.20, including interest. Micky had come to the truth. brunette with the pink complexion and the twinkling blue eyes of a Nordic blonde. In her crisp. "Aha!" The preacher made an appealing gesture to the audience. "Is there any difference, my friends? Can we see atoms? Is this not arrogant insolence?" He looked back at the boy and jabbed an accusing finger at him. "Do you claim to have seen atoms? Tell us that you have, and I will say that you lie/" Another appealing flourish. "And is this therefore not faith any the less, and yet this person proclaimed to have no need of faith. Does he not, therefore, contradict himself before us?" "Army logic," Colman murmured. unmarked by the violence that had changed her life. The unrevealed half of her face, pressed into the. Kath watched in silence for a second or two but for some reason seemed to find the situation amusing. Bernard stared with a mixture of uncertainty and resentment. "I think I know what's going through your mind," she told him. "But don't worry about it. We don't take orders from Farnhill or Merrick here. Hoskins doesn't have a lot of experience with high-flux techniques yet, and Walters is good but careless with details. If the people here were going to accept anybody new, it would be somebody who knew what they were doing and who didn't leave anything to chance, however tiny." "Yeah, I heard that somewhere," Leilani replied, picking up her fork. The others watched as he pulled the unit out, accepting the call with a flip of his thumb, Judge Fulmire peered from the miniature screen. "Are you alone, Paul?" Fulmire asked without preamble. His voice was clipped and terse. Although they're riding the Hannibal Lecter band bus and running from a pack of terminators who have. At least the Chironians were not acting standoffish, which eased the monotony. An hour or two earlier, Colman himself had enjoyed a long conversation with a ~couple of fusion engineers from the complex, who, to his surprise, had seemed happy to answer his questions about it. They had even offered him a quick tour. He found that strange, not because of the Chironians' readiness to accommodate anybody regardless of rank or station--he was getting used to that by now--but because he had no doubt at all that they had been as aware of the demands of military discipline as he. Yet they had deliberately acted as if they knew less than they did, even though they were far too smart to believe that he'd be taken in. The Chironians did it all the time. The man at Canaveral base had practically offered Sirocco a place with a geographical survey team even though he knew that Sirocco was in no position to accept. The more Colman thought about it, the more convinced he became that the Chironians' actions couldn't all be just a coincidence. "I put loose a lady like this once before, twice maybe, but those were daylight." Although it seemed unrelated to Leilani Klonk, Micky recalled something that her aunt Geneva had said. Oblivious of Micky, Sinsemilla sat, elbows propped on her knees, chin cupped in the heels of her hands, never had a romantic relationship with Sinatra, though if he'd ever come around, I'm not sure I could have. "Don't leave them at the post," Sirocco said. "Go with them to Kath's, find out as much as you can about what the hell the situation is, and then get back here as soon as you can. That way, maybe we'll be able to figure out what needs to be done." about, so we talk around them." Above all there remained Borftein, who had nowhere else? to attach a loyalty that his life had made compulsive. Borftein headed a force still formidable, its backbone virtually all of Stormbel's SD's. Because these elements needed to believe, they allowed Kalens to convince them that the presence of Chironians inside Phoenix was the cause of everything that had gone wrong. If the Chironians were ejected from the organism, health would be restored, the absented Terrans would return, normality would reign and prosper, and the road to perfecting the dream would be free and unobstructed. steering wheel, the better to see him. "Neither do I. But we can't just do nothing." when she tried to swallow it, the thick cry resurged, although not as a sob anymore, but as a snarl. Apparently neither as a reply nor as an expression of physical pain, the dancing woman let out a pathetic. Nobody talked any more about annexing Franklin. Howard Kalens's chances of

being elected to perpetuate the farce plummeted to as near zero as made no difference, and Paul Lechat, recognizing what he saw as a preview of the inevitable, dropped his insistence for a repeat performance in Iberia; at least, that was the reason he offered publicly. Ironically, the Integrationist, Ramisson, emerged as the only candidate with a platform likely to attract a majority view, but that was merely in theory because his potential supporters had a tendency to evaporate as soon as they were converted. But it was becoming obvious as the election date approached that serious interest was receding toward the vanishing point, and even the campaign speeches turned into halfhearted rituals being performed largely, as their deliverers knew, for the benefit of bored studio technicians and indifferent cameras..sigh. "Can I ask you something?" he said, looking up. "Do I have to answer it?". "All right then," Cromwell challenged. "Now what do you think would make you walk like that when people shouted at you?". There seemed to be no more to say. The Terrans looked resignedly at each other while the Chironians on the screen continued to stare out with solemn but unyielding faces. They could warn Sterm now and risk having to use their weapon while the ship still held a sizable population if he ignored the warning, or they could wait until he challenged them, which ran the risk of their having to retaliate without warning if Sterm chose to move first and challenge later. Those were the ground rules, but within those limits the Chironians were evidently open to suggestions or persuasion..The major stared at him as if refusing to believe his ears. "Was that why those guys took off?" Jay asked, by now having regained most of his color. "It probably had something to do with it," Colman said, grinning. "That's the kind of trash you have to deal with. Still interested?". Wellesley raised a hand a fraction. "Be careful you don't allow this to get too personal, Howard," he cautioned. "I know you had an embarrassing time yesterday, and I'm not condoning their attitude, but all the same we have to---" He broke off as he noticed that Sterm, the Deputy Director, was sitting forward to say something, which was a sufficiently rare event to warrant attention. "Yes, Matt?" The others looked toward Sterm curiously..congressman's doom in the Neiman Marcus bag. The weight of her husband's betrayals didn't pull the. "Why should I? Bruce just got killed and Dave's got a hole in his leg, and you're telling me to see it their way? What kind of a man are you anyhow?" She sneered past Colman's shoulder at Kath, who was returning the communicator to her pocket. "I can see why. It didn't take you long, did it? Is she good?". "Really? You don't look like you've been raised in a box.". "Why would he kill a helpless child?" Geneva asked..CHAPTER FIVE.* * *.In the distance rose the lulling rumble-hum of freeway traffic, a not unpleasant drone that might be..spitting, the dog seems to be saying, Teeth? You want teeth? Take a look at THESE teeth, go.Colman nodded. "Sure. They're selected and trained to obey orders and not ask questions. Some of them would shoot their own mothers if the right person said so. And Stormbel was in on it. It fits." He thought for a second longer, and then looked at Lechat and Bernard. "There were a lot of suspicious things about Padawski breaking out too. It couldn't have happened the way it did without inside help. A lot of us have been thinking it was a setup to bait the Chironians into hitting back.". Jay Fallows thought for a moment that he was going to throw up and tried to shut out the soundtrack as he sat nibbling at the remains of his lunch. An astronomy book lay propped open on the table in front of him. Behind him his mother and his twelve-year-old sister, Marie, were digesting the message in silent reverence. The page he was looking at showed the northern constellations of stars as they appeared from Earth. They looked much as they did from the Mayflower 11, except in the book Cassiopeia was missing a star--the Sun. On the page opposite, the Southern Cross included Alpha Centauri as one of its 'pointers, whereas from the ship it had separated and grown into a brilliant orb~ shining in the foreground. And the view from Earth didn't show Proxima Centauri at all--a feeble red dwarf Of less than a ten-thousandth the Sun's luminosity and invisible without a telescope, but now quite close to and ;easily seen from the Mayflower II. Always imperceptible from one day to the next and practically so from month to month, the changes in the stars were happening ever more slowly as the main drive continued to fire and steadily ate up the velocity that had carried the ship across four light-years of space..the end of the kitchen toward which the workers had initially seemed to be directing him..Bernard spread his hands resignedly. "I haven't been in on it at the top level. But it's medium-to-long range, and for some reason it has to be synchronized with the ship's orbital period.". "What alternative?". Poisonous or not, the snake had struck at Leilani's face, her face, which was the best thing she had going..Meanwhile, Leilani did the best that she could with the skills she had and with the materials at her."I can speak for them," Charez said. "You can ten the general that the news is good.".Leilani pulled open the door..either. Yet..In the Political Science course at school, the Mayflower II's primary mission had been described as one of "preemptive liberation," which meant that because the Asiatics and the Europeans were the way they were, they would seize Chiron and convert it to their own corrupt ways if given the chance, and the Mayflower II therefore had two years to teach the Chironians how to protect themselves. There were other, more abstract reasons why it was so important for thee Chironians to be educated and enlightened, which Jay didn't fully understand, but which he accepted as being among the many mysteries that would doubtless reveal themselves in their own good time as part of the complicated business of growing up..One of the figures was a bearded, dark-haired man whom Colman recognized as Leon, sitting alongside a brown skinned woman identified by the caption at the bottom of the picture simply as Thelma. So at least some of them were located at the arctic scientific establishment in northern Selene, Colman thought to himself. The other pair of figures were Otto, of Asiatic appearance, and Chester, who was

black; the ones shown alone in the remaining two sections of the screen were Gracie, another Oriental, and Smithy, a blond Caucasian with a large moustache and long sideburns. From their ages they were all evidently Founder. Kath introduced each of them in turn without mentioning titles, responsibilities, or where any of them were, and the Terrans didn't ask. THE FIRST BOMB exploded in the center of Canaveral City in the early hours of the morning, causing serious damage to the maglev terminal where the spur line into the shuttle base joined the main through-route from Franklin out to the Peninsula. Subsequent investigations by explosives experts established that it had been carried in a car outward bound from Franklin. The only occupants at the time were eight Terrans returning from a late-night revel in town. They were killed instantly..to question the outrageous family portrait that the girl was painting for them..From the center of the floor Wellesley asked, "What do you want?".A couple of minutes went by. Nobody moved. The robot's lights continued to wink at him cheerfully. Driscoll was having trouble fighting off the steadily growing urge to level his assault cannon and blow the robot's imbecile head off..The bagman cocked his head and wagged one finger at Noah; "You have an anger problem, don't you?". "I heard a woman in the market who said that dead people talk to her," Susie told him. "That's even more ridiculous..". "That's monumentally romantic, Mrs. D, but as my mother's proved with numerous doper boyfriends, it." "I thought it would be at least one ninety," Micky replied..
